

# Enroll now for the 2024-2025 academic year!

Two Wings is an international school offering fully French-language learning programs in nursery, pre-kindergarten, and kindergarten. Two Wings International School offers a bilingual program in the primary section. The Cambridge Primary program (Grade 1, Grade 2, and Grade 3) is offered in the 4 main subjects of the Cambridge Program (English, Science, Mathematics, and Computer Sciences (Robotics, Coding, Digital Literacy, ICT...)).

These subjects are taught in English. All other subjects are taught in French, including French (8 periods per week), social studies (3 periods per week), character education or moral and spiritual education that helps in the acquisition of human virtues (2 Wings periods per week), sports (2 periods per week), and art (one period per week).

Music and other extracurricular activities are all taught in French and integrated into daily learning. In addition to these rich and varied academic aspects, the school offers a high-quality swimming program.

Children practice and, with the help of a team of qualified swimming instructors, they learn to swim if they do not already know how. Others practice this discipline just for the sake of exercise and leisure because after a while, especially at the primary school level, everyone should be good at swimming and capable of swimming in depth. This training takes place twice a week.

This learning program gradually leads us towards bilingualism, with students demonstrating basic bilingual abilities upon leaving kindergarten. This school year 2024-2025, in addition to the first and second grades, our institution is opening the third grade. Enrolment is open. The academic year 2024-2025 begins on August 19, 2024.

Welcome to Two Wings International School!
